

CHAPTER 17
AIRPORT OVERLAY ZONE, AOZ

17.14

TRANSITIONAL ZONES - HEIGHT LIMITATION

The height limitation in a transitional zone slopes upward and outward 7 feet horizontally for each foot vertically beginning at the side of and at the same elevation as the primary surface and the approach zones, and extending to a height of 150 feet above the airport elevation. In addition to the foregoing there are established height limits sloping upward and outward 7 feet horizontally for each foot vertically beginning at the sides of and at the same elevation of the approach zones and extending to where they intersect the conical surface. Where the precision instrument runway approach zone projects beyond the conical zone height limits sloping upward and outward 7 feet horizontally for each foot vertically shall be maintained beginning at the sides of and at the same elevation as precision instrument runway approach surface, and extending to a horizontal distance of 5,000 feet measured at a 90 angle to the extended runway centerline.
